To John J. Carty, Chief Engineer, The
American Telephone and Telegraph Company,
of New York, N. Y., in recognition of
his signal success in obtaining solutions of
these fundamental and varied physical and
technical problems involved in developing
to its present high state the art of trans-
mitting speech by electro-magnetic means.

And to Theodore William Richards, Director,
Wolcott Gibbs Memorial Laboratory, Harvard
University, in recognition of his numerous
and important contributions to inorganic,
physical and theoretical chemistry, and
particularly his classical series of re-
determinations of the atomic weights of
the more important chemical elements.
